

FAVICON FILE FORMAT CHECKLIST

ICO Format

- Supports multiple sizes in one file (16×16, 32×32, 48×48)
- Compatible with all major browsers, including legacy ones
- Ideal for traditional desktop and browser favicons

PNG Format

- High-quality raster image with sharp edges
- Supports transparency for flexible background use
- Works on modern browsers and mobile devices
- Can be exported in multiple sizes for different contexts

SVG Format

- Vector-based format that scales without losing quality
- Perfect for high-resolution displays and responsive designs
- Supported by modern browsers (may have limited support on older browsers)
- Ideal for logos with simple shapes and bold lines

Apple Touch Icon (PNG)

- Size: 180×180 pixels
- Required for iOS home screen shortcuts
- Use transparent background or brand-consistent color

Android / PWA Icon (PNG or SVG)

- Size: 512×512 pixels for Progressive Web Apps
- Ensures crisp display on high-resolution mobile devices
- Optimized for fast loading and clear visibility
